INDEX TO SUBJECTS

A

Acanthamoeba, phagolysosomes, in vitro vacuole fusion, light and EM, 217

Acetylcholine receptor protein, localization of, *Electrophorus electricus* electroplaque, autoradiography and biochemistry and electrophysiology, 200

– transmitter, cultured rat sympathetic neurons, amine uptake system, autoradiography and biochemistry and electrophysiology, 121

– uncoupling, mouse pancreas and lacrimal acinar cells, electrophysiology, 533

Actin cables and microtubules in fibroblasts and macrophages, beige mouse, immunofluorescence, 401

– filaments, membrane-associated, visualization of polarity, EM, 846

–, localization in microvilli and terminal web, mouse intestinal brush border, immunofluorescence, 839

– synthesis throughout cell cycle, HeLa cells, autoradiography and biochemistry, 833

–, tubulin, and postsynaptic density polypeptide, rat brain synaptic proteins, autoradiography and biochemistry, 173

α-Actinin, chicken gizzard, localization in cleavage furrow during cytokinesis, biochemistry and fluorescence microscopy, 268

Adenylyl imidodiphosphate, effects on reactivated and rigor wave sea urchin sperm, biochemistry, 827

Adhesion, chick embryo neural cells, role of surface molecule CAM in neurite bundle formation, spinal ganglia cultures, cinematography and phase contrast microscopy and scanning EM, 382

–, relationship to surface molecule CAM and histotypic patterns, chick embryo neural cells, biochemistry and cytology and EM, 371

–, role of membrane proteins, mouse peritoneal macrophages, autoradiography and immunofluorescence, 263

– sites, substrate, glycosaminoglycan pools, murine cells, biochemistry, 788

Agglutination, flagellar membrane, and sexual signaling, *Chlamydomonas gam*-1 mutant, freeze-fracture and scanning EM, 74

Agglutinin, wheat germ, binding to Chinese hamster ovary cells, mobility of membrane components, biochemistry and fluorescence microscopy, 617

Alga *Chlamydomonas reinhardi, gam*-1 mutant, flagellar membrane agglutination and sexual signaling, freeze-fracture and scanning EM, 74

– *Chlamydomonas reinhardi*, gametes, "tipping" and mating-structure activation induced by flagellar membrane antisera, immunofluorescence and EM, 680

Amine uptake system, cultured rat sympathetic neurons, acetylcholine as transmitter, autoradiography and biochemistry and electrophysiology, 121

Anaphase, lysed PtK_1 cells, vanadate inhibition of chromosome movement, biochemistry and light microscopy, 573

Antigens, cellular, *Staphylococcus aureus*, localization in SDS-polyacrylamide gels, autoradiography and biochemistry and immunology, 281

–, surface, distribution on mouse thymocyte uropods, light and EM, 235

Antimycin A, effect on calcium-dependent disassembly and reassembly of occluding junctions, guinea pig pancreatic acinar cells, freeze-fracture EM, 156

Antimyosin, type-specific, transformation of individual fibers, rabbit fast muscle, immunology and fluorescence microscopy, 252

Antisera, flagellar membrane, induction of "tipping" and mating structure activation, *Chlamydomonas* gametes, immunofluorescence and EM, 680

Axons, growing, composition of, rat sympathetic neurons, autoradiography and biochemistry and light and EM, 138

B

Bacteria *Halobacterium halobium*, light-scattering change induced by bacteriorhodopsin, biochemistry, 657

Bacteriorhodopsin, induction of light-scattering change, *Halobacterium halobium*, biochemistry, 657

Basal bodies and centrioles, visualization of with nonimmune rabbit sera, immunofluorescence, 526

– body, quantitative variations in 17 species, *Tetrahymena*, light microscopy, 727

Beta vulgaris alba, chloroplast DNA visualization, use of probe 4,6-diamidino-2-phenylindole, fluorescence microscopy, 623

Body wall longitudinal muscle, mollusc, calcium intracellular localization and translocation during contraction, EM and X-ray microanalysis, 467

– wall longitudinal muscle, mollusc, contraction and ultrastructure of, physiology and freeze-fracture EM, 454

Brain, calf, intermediate filaments, biochemistry and immunofluorescence, 637

–, chick embryo, optic tectum, distribution of endogenous lectin, immunofluorescence, 491

–, rat, synaptic proteins, tubulin, actin, and postsynaptic density polypeptide, autoradiography and biochemistry, 173

Brush border myosin, chicken intestinal epithelial cells, biochemistry and immunofluorescence, 444

C

Calcium control of ciliary arrest, mussel gill cells, light and EM, 110

–, intracellular localization and translocation during contraction, mollusc longitudinal body wall muscle, EM and X-ray microanalysis, 467

– ionophore A23187, effect on surface macromolecule capping, mouse lymphocytes, immunofluorescence, 419

– and magnesium, role in matrix protein modulation of nuclear membrane lipid fluidity, electron spin reso-

nance and freeze-etch EM, 479
Calcium, role in disassembly and reassembly of occluding junctions, role of drugs, guinea pig pancreatic acinar cells, freeze-fracture EM, 156
–, role in stimulus-secretion coupling, concanavalin A-Sepharose induction of mast cell degranulation, light and EM, 394
Calf, brain, intermediate filaments, biochemistry and immunofluorescence, 427
–, muzzle epidermis, desmosomes and tonofilaments, biochemistry and EM, 637
CAM, surface molecule, relationship to cell adhesion and histotypic patterns, chick embryo neural cells, biochemistry and cytology and EM, 371
–, surface molecule, role in neurite bundle formation, chick embryo spinal ganglia cultures, cinematography and phase contrast microscopy and scanning EM, 382
Capping, surface macromolecules, mouse lymphocytes, distribution of cytoplasmic myosin, immunofluorescence, 409
–, surface macromolecules, mouse lymphocytes, effects of local anesthetics and calcium ionophore, immunofluorescence, 419
Cartilage matrix, extracellular, role in fibronectin synthesis, chondrocyte cultures, biochemistry and immunofluorescence, 342
Cell cycle, synthesis of 90 proteins including actin, HeLa cells, autoradiography and biochemistry, 833
Cells, acinar, guinea pig pancreas, calcium-dependent disassembly and reassembly of occluding junctions, effect of drugs, freeze-fracture EM, 156
–, acinar, mouse pancreas, electrical coupling and uncoupling, electrophysiology, 533
–, BALB/c 3T3, glycosaminoglycan pools, substrate adhesion site, biochemistry, 788
–, BHK-21, cytoplasmic fibers and intracellular movements, light and EM and time-lapse cinematography, 708
–, Chinese hamster ovary, binding of wheat germ agglutinin, mobility of membrane components, biochemistry and fluorescence microscopy, 617
–, cultured arterial smooth muscle and endothelial, mediation of pinocytosis by platelet-derived growth factor, autoradiography and biochemistry and cytology, 663
–, epithelial, chicken small intestine, myosin localization in brush border, biochemistry and immunofluorescence, 444
–, HeLa S3, synthesis of 90 proteins including actin throughout cell cycle, autoradiography and biochemistry, 833
–, luteal, guinea pig, effect of progesterone on Golgi complex, GERL, and lysosomes, cytochemical EM, 45
–, luteal, guinea pig, postpartum regression, Golgi complex and GERL, origin of lysosomes and autophagic vacuoles, cytochemical EM, 59
–, mouse fibroblasts and neuroblastoma, rat glial, visualization of centrioles and basal bodies by nonimmune rabbit sera, immunofluorescence, 526
–, neural, chick embryo, relationship of surface molecule CAM to cell adhesion and histotypic patterns, biochemistry and cytology and EM, 371
–, neural, chick embryo, role of surface molecule CAM in neurite bundle formation, spinal ganglia cultures, cinematography and phase contrast microscopy and scanning EM, 382
Cells, primary avian tendon, malignant transformation, biochemistry and cytology, 672
–, primary keratinocytes, stratification, specialization, and proliferation of, autoradiography and scanning and transmission EM, 356
–, PtK_1, lysed mitotic, vanadate inhibition of chromosome movement, biochemistry and light microscopy, 573
–, Vero, growth-related fluctuation in messenger RNA utilization, biochemistry and EM, 85
Centrioles and basal bodies, visualization of with nonimmune rabbit sera, immunofluorescence, 526
Chediak-Higashi syndrome, beige mouse, microtubules and actin cables in fibroblasts and macrophages, immunofluorescence, 401
Chick, embryo, brain optic tectum, distribution of endogenous lectin, immunofluorescence, 491
–, embryo, neural cells, relationship of surface molecule CAM to cell adhesion and histotypic patterns, biochemistry and cytology and EM, 371
–, embryo, neural cells, role of surface molecule CAM in neurite bundle formation, spinal ganglia cultures, cinematography and phase contrast microscopy and scanning EM, 382
–, fibroblasts, fibronectin synthesis in chondrocyte cultures, role of extracellular cartilage matrix, biochemistry and immunofluorescence, 342
–, neural retina, glycoprotein changes during development of, autoradiography and biochemistry, 132
Chicken, gizzard, α-actinin, localization in cleavage furrow during cytokinesis, biochemistry and fluorescence microscopy, 268
–, nascent ovalbumin, functional equivalent of signal sequence, biochemistry, 567
–, small intestine, epithelial cells, myosin localization in brush border, biochemistry and immunofluorescence, 444
Chlamydomonas reinhardi, gam-1 mutant, flagellar membrane agglutination and sexual signaling, freeze-fracture and scanning EM, 74
– *reinhardi*, gametes, "tipping" and mating-structure activation induced by flagellar membrane antisera, immunofluorescence and EM, 680
Chloroplast and nuclear DNA, quantitation of, tobacco leaf, biochemistry and fluorescence microscopy, 631
Chloroplasts, higher plants, DNA visualization, use of probe 4,6-diamidino-2-phenylindole, fluorescence microscopy, 623
Chlorpromazine, effect on surface macromolecule capping, mouse lymphocytes, immunofluorescence, 419
Cholinergic receptor protein, localization of, *Electrophorus electricus* electroplaque, autoradiography and biochemistry and electrophysiology, 200
Chondrocyte cultures, fibronectin synthesis, role of extracellular cartilage matrix, biochemistry and immunofluorescence, 342
Choroid plexus, guinea pig, microvilli, microfilament-membrane attachments, thin section and freeze-fracture EM, 774
Chromosome movement, vanadate inhibition of, lysed

mitotic PtK_1 cells, biochemistry and light microscopy, 573
Cilia, calcium control of motility, mussel gill cells, light and EM, 110
Cleavage furrow, α-actinin localization during cytokinesis, biochemistry and fluorescence microscopy, 268
Colchicine, effect on calcium-dependent disassembly and reassembly of occluding junctions, guinea pig pancreatic acinar cells, freeze-fracture EM, 156
Concanavalin A receptors, distribution on mouse thymocyte uropods, light and EM, 235
– A-Sepharose beads, induction of mast cell degranulation, role of calcium in stimulus-secretion coupling, light and EM, 394
Cone cell endings, membrane recycling, turtle retina, EM, 802
Corpus luteum, guinea pig, effect of maximal progesterone on Golgi complex, GERL, and lysosomes, cytochemical EM, 45
– luteum, guinea pig, Golgi complex and GERL, postpartum luteal cell regression, origin of lysosomes and autophagic vacuoles, cytochemical EM, 59
Correction, 600
Cotyledons, mung bean, localization of vicilin peptidohydrolase, immunofluorescence, 10
Coupling, acinar cells, mouse salivary gland, electrophysiology and EM, 20
–, excitation-contraction, mollusc longitudinal body wall muscle, calcium intracellular localization and translocation, EM and X-ray microanalysis, 467
–, excitation-contraction, mollusc longitudinal body wall muscle, physiology and freeze-fracture EM, 454
–, stimulus-secretion, role of calcium, concanavalin A-Sepharose induction of mast cell degranulation, light and EM, 394
Crayfish *Procambarus clarkii*, ventral nerve cord, rectifying electrotonic synapse, freeze-fracture and scanning EM, 764
Crithidia acanthocephali, kinetoplast DNA, cleavage by restriction endonucleases *Eco*RI and *Hind*III, biochemistry and EM, 329
Cytochrome b_5 binding to membranes of rat liver subcellular organelles, biochemistry and immunochemistry and EM, 291
Cytokinesis, α-actinin localization in cleavage furrow during, biochemistry and fluorescence microscopy, 268
Cytoplasmic filaments, intracellular movements, BHK-21 cells, light and EM and time-lapse cinematography, 708
Cytoskeleton, beige mouse, distribution of microtubules and actin cables, immunofluorescence, 401

D

Decoration of specific sites, yeast membranes, ultrahigh vacuum freeze-fracture EM, 646
Desmosomes and tonofilaments, calf muzzle epidermis, biochemistry and EM, 427
4,6-Diamidino-2-phenylindole, visualization of chloroplast DNA, higher plants, fluorescence microscopy, 623
Diaphragm, mouse, open junctions in postcapillary venule endothelium, freeze-fracture EM, 27
Diatom *Fragilaria capucina*, spindle microtubules, distribution of, light and EM, 737
DNA, chloroplast and nuclear, quantitation of, tobacco leaf, biochemistry and fluorescence microscopy, 631
–, chloroplasts of higher plants, visualization by use of probe 4,6-diamidino-2-phenylindole, 623
–, *Crithidia acanthocephali*, kinetoplast, cleavage by restriction endonucleases *Eco*RI and *Hind*III, biochemistry and EM, 329
Dolabella auricularia, longitudinal body wall muscle, calcium intracellular localization and translocation during contraction, EM and X-ray microanalysis, 467
– *auricularia*, longitudinal body wall muscle, contraction and ultrastructure of, physiology and freeze-fracture EM, 454

E

Electron microscopy, decoration of specific sites, ultrahigh vacuum freeze-fractured yeast membranes, 646
Electrophorus electricus, electroplaque, localization of cholinergic receptor protein, autoradiography and biochemistry and electrophysiology, 200
Electroplaque, *Electrophorus electricus*, localization of cholinergic receptor protein, autoradiography and biochemistry and electrophysiology, 200
Elliptio complanatus, gill cells, calcium control of ciliary arrest, light and EM, 110
Embryo, chick, brain optic tectum, distribution of endogenous lectin, immunofluorescence, 491
–, chick, neural cells, relationship of surface molecule CAM to cell adhesion and histotypic patterns, biochemistry and cytology and EM, 371
–, chick, neural cells, role of surface molecule CAM in neurite bundle formation, spinal ganglia cultures, cinematography and phase contrast microscopy and scanning EM, 382
Endonucleases, restriction, *Eco*RI and *Hind*III, cleavage of kinetoplast DNA, *Crithidia acanthocephali*, biochemistry and EM, 329
Endoplasmic reticulum marker enzymes, rat liver Golgi fraction, biochemistry and EM, 581
Endothelium, postcapillary venules, mouse diaphragm, open junctions in, freeze-fracture EM, 27
Environment, effect on malignant transformation, cultured primary avian tendon cells, biochemistry and cytology, 672
Enzyme, vicilin peptidohydrolase, localization of in mung bean cotyledons, immunofluorescence, 10
Enzymes, marker of endoplasmic reticulum, presence on rat liver Golgi fraction, biochemistry and EM, 581
–, restriction endonucleases *Eco*RI and *Hind*III, cleavage of kinetoplast DNA, *Crithidia acanthocephali*, biochemistry and EM, 329
Epidermis, basal cells, in vitro keratinocyte cultures, stratification, specialization, and proliferation of, autoradiography and scanning and transmission EM, 356
–, calf muzzle, desmosomes and tonofilaments, biochemistry and EM, 427
Evolution, *Tetrahymena*, quantitative basal body variations in 17 species, light microscopy, 727

F

Factor, growth, platelet-derived, mediation of pinocytosis, cultured arterial smooth muscle and endothelial cells, autoradiography and biochemistry and cytology, 663
Fiber types, transformation of, use of type-specific antimyosins, rabbit fast muscle, immunology and fluorescence microscopy, 252
Fibroblasts, chick, protein intracellular transport, comparative study, autoradiography and biochemistry, 694
– and macrophages, microtubules and actin cables in, beige mouse, immunofluorescence, 401
Filaments, actin, membrane-associated, visualization of polarity, EM, 846
–, cytoplasmic, intracellular movements, BHK-21 cells, light and EM and time-lapse cinematography, 708
–, intermediate, nervous tissue, biochemistry and immunofluorescence, 637
Flagella, membrane agglutination and sexual signaling, *Chlamydomonas gam*-1 mutant, freeze-fracture and scanning EM, 74
–, sea urchin sperm, effects of adenylyl imidodiphosphate, biochemistry, 827
–, sea urchin sperm, in vitro assembly of outer doublet tubulin, biochemistry and EM, 500
Follicular dendritic cells, mouse spleen, distribution of horseradish peroxidase-anti-HRP immune complexes, immunology and cytochemical light and EM, 184
Fragilaria capucina, spindle microtubules, distribution of, light and EM, 737
Frog *Rana catesbeiana*, kidney, glomerular permeability, light and EM, 314

G

Gametes, *Chlamydomonas*, "tipping" and mating-structure activation induced by flagellar membrane antisera, immunofluorescence and EM, 680
GERL, Golgi complex, and lysosomes, effect of maximal progesterone, guinea pig corpus luteum, cytochemical EM, 45
– and Golgi complex, postpartum luteal cell regression, origin of lysosomes and autophagic vacuoles, guinea pig corpus luteum, cytochemical EM, 59
Gill cells, mussel, calcium control of ciliary arrest, light and EM, 110
Gizzard, chicken, α-actinin localization in cleavage furrow during cytokinesis, biochemistry and fluorescence microscopy, 268
Glomerulus, frog, ultrastructure of basement membrane, light and EM, 314
Glucose, effect on protein biosynthesis, rat testes spermatid, biochemistry and EM, 1
Glycoprotein changes during chick retina development, autoradiography and biochemistry, 132
Glycosaminoglycan pools, substrate adhesion site, murine cells, biochemistry, 788
Golgi complex, GERL, and lysosomes, effect of maximal progesterone, guinea pig corpus luteum, cytochemical EM, 45
– complex and GERL, postpartum luteal cell regression, origin of lysosomes and autophagic vacuoles, guinea pig, corpus luteum, cytochemical EM, 59
Golgi fraction, rat liver, endoplasmic reticulum marker enzymes on, biochemistry and EM, 581
– membranes, rat liver, NADPH-cytochrome P-450 reductase, biochemistry and immunoadsorption and EM, 590
Growth, effect on messenger RNA utilization, Vero cells, biochemistry and EM, 85
– factor, platelet-derived, mediation of pinocytosis, cultured arterial smooth muscle and endothelial cells, autoradiography and biochemistry and cytology, 663
Guinea pig, choroid plexus, microvilli, microfilament-membrane attachments, thin section and freeze-fracture EM, 774
– pig, corpus luteum, effect of maximal progesterone on Golgi complex, GERL, and lysosomes, cytochemical EM, 45
– pig, corpus luteum, Golgi complex and GERL, postpartum luteal cell regression, origin of lysosomes and autophagic vacuoles, cytochemical EM, 59
– pig, pancreas, acinar cells, calcium-dependent disassembly and reassembly of occluding junctions, effect of drugs, freeze-fracture EM, 156
– pig, pancreas, protein intracellular transport, comparative study, autoradiography and biochemistry, 694

H

Halobacterium halobium, light-scattering change induced by bacteriorhodopsin, biochemistry, 657
Histotypic patterns, relationship to surface molecule CAM and cell adhesion, chick embryo neural cells, biochemistry and cytology and EM, 371
Horseradish peroxidase-anti-HRP immune complexes, distribution of, mouse spleen follicular dendritic cells, immunology and cytochemical light and EM, 184

I

Immune complexes, horseradish peroxidase-anti-HRP, distribution of, mouse spleen follicular dendritic cells, immunology and cytochemical light and EM, 184
Interphase, distribution of major polypeptides of nuclear pore complex-lamina fraction, immunofluorescence and EM, 546
Intestine, mouse, brush border microvilli and terminal web, localization of actin and microfilament-associated proteins, immunofluorescence, 839
–, rat, microvilli, microfilament-membrane attachments, thin section and freeze-fracture EM, 774
–, small, chicken, epithelial cells, myosin localization in brush border, biochemistry and immunofluorescence, 444
–, small, rabbit, microvillous membrane, localization of sucrase-isomaltase complex, cytochemical EM, 516
Ionophore A23187, calcium control of ciliary arrest, mussel gill cells, light and EM, 110
Isomaltase-sucrase complex, localization of, rabbit microvillous membrane, cytochemical EM, 516

J

Junctions, gap, acinar cells, mouse salivary gland, electrophysiology and EM, 20

Junctions, occluding, calcium-dependent disassembly and reassembly of, role of drugs, guinea pig pancreatic acinar cells, freeze-fracture EM, 156
–, open, mouse diaphragm postcapillary venule endothelium, freeze-fracture EM, 27
–, rectifying electrotonic, crayfish ventral nerve cord, freeze-fracture and scanning EM, 764

K

Keratinocytes, primary cultures, stratification, specialization, and proliferation of, autoradiography and scanning and transmission EM, 356
Kidney, frog, glomerular permeability, light and EM, 314
Kinetoplast, *Crithidia acanthocephali*, DNA cleavage by restriction endonucleases *Eco*RI and *Hind*III, biochemistry and EM, 329
Kinetosomes, quantitative variations in 17 species, *Tetrahymena*, light microscopy, 727

L

Lacrimal glands, exorbital, mouse, acinar cells, electrical coupling and uncoupling, electrophysiology, 533
Leaf, tobacco, quantitation of chloroplast and nuclear DNA, biochemistry and fluorescence microscopy, 631
Lectin detection of glycoprotein changes, chick retina development, autoradiography and biochemistry, 132
–, endogenous, distribution of, chick embryo optic tectum, immunofluorescence, 491
Light, effect on cone cell endings, turtle retina, EM, 802
Light-scattering change, effect of bacteriorhodopsin, *Halobacterium halobium*, biochemistry, 657
Lipid fluidity, *Tetrahymena* nuclear membrane, modulation by matrix proteins, role of Ca/Mg, electron spin resonance and freeze-etch EM, 479
Liver, rat, Golgi fraction, endoplasmic reticulum marker enzymes on, biochemistry and EM, 581
–, rat, Golgi membranes, NADPH-cytochrome P-450 reductase, biochemistry and immunoadsorption and EM, 590
–, rat, micrococcal nuclease-digested nuclei, nucleosome fractionation by salt elution, biochemistry and phase microscopy, 97
–, rat, nuclear pore complex-lamina fraction, interphase and mitotic distribution of, immunofluorescence and EM, 546
–, rat, subcellular organelles, cytochrome b_5 binding to membranes of, biochemistry and immunochemistry and EM, 291
Lymphocytes, mouse spleen, surface macromolecule capping, distribution of cytoplasmic myosin, immunofluorescence, 409
–, mouse spleen, surface macromolecule capping, effects of local anesthetics and calcium ionophore, immunofluorescence, 419
Lysosomes, *Acanthamoeba*, in vitro vacuole fusion, light and EM, 217
–, Golgi complex, and GERL, effect of maximal progesterone, guinea pig corpus luteum, cytochemical EM, 45
–, origin of, Golgi complex and GERL, postpartum luteal cell regression, guinea pig, cytochemical EM, 59
Lytechinus pictus, sperm, reactivated and rigor wave, effects of adenylyl imidodiphosphate, biochemistry, 827

M

Macrophages and fibroblasts, microtubules and actin cables in, beige mouse, immunofluorescence, 401
–, peritoneal, mouse, protein intracellular transport, comparative study, autoradiography and biochemistry, 694
–, peritoneal, mouse, role of membrane proteins in cell adhesion, autoradiography and immunofluorescence, 263
Magnesium and calcium, role in matrix protein modulation of nuclear membrane lipid fluidity, electron spin resonance and freeze-etch EM, 479
Mast cells, peritoneal, rat, localized degranulation induced by concanavalin A-Sepharose beads, role of calcium in stimulus-secretion coupling, light and EM, 394
Mating-structure activation and "tipping" induced by flagellar membrane antisera, *Chlamydomonas* gametes, immunofluorescence and EM, 680
Membrane agglutination, flagellar, and sexual signaling, *Chlamydomonas gam*-1 mutant, freeze-fracture and scanning EM, 74
– asymmetry, sarcoplasmic reticulum, rabbit skeletal muscle, tannic acid fixation, EM, 601
– attachment to microfilament, choroid plexus and intestinal microvilli, thin section and freeze-fracture EM, 774
– components, mobility of, Chinese hamster ovary cells, binding of wheat germ agglutinin, biochemistry and fluorescence microscopy, 617
–, filaments, visualization of actin polarity, EM, 846
– proteins, role in cell adhesion, mouse peritoneal macrophages, autoradiography and immunofluorescence, 263
– recycling in cone cell endings, turtle retina, EM, 802
Membranes, basement, frog glomerulus, light and EM, 314
–, Golgi, rat liver, NADPH-cytochrome P-450 reductase, biochemistry and immunoadsorption and EM, 590
–, microvillous, rabbit small intestine, localization of sucrase-isomaltase complex, cytochemical EM, 516
–, nuclear, *Tetrahymena*, lipid fluidity, modulation by matrix proteins, role of Ca/Mg, electron spin resonance and freeze-etch EM, 479
–, rat liver subcellular organelles, cytochrome b_5 binding, biochemistry and immunochemistry and EM, 291
–, yeast, decoration of specific sites, ultrahigh vacuum freeze-fracture EM, 646
Microfilament attachment to membrane, choroid plexus and intestinal microvilli, thin section and freeze-fracture EM, 774
Microfilaments, protein-associated, localization in microvilli and terminal web, mouse intestinal brush border, immunofluorescence, 839

Microtubules and actin cells in fibroblasts and macrophages, beige mouse, immunofluorescence, 401
–, diatom spindle, distribution of, light and EM, 737
Microvilli, choroid plexus and intestinal, microfilament-membrane attachments, thin section and freeze-fracture EM, 774
–, membrane, rabbit small intestine, localization of sucrase-isomaltase complex, cytochemical EM, 516
–, mouse intestinal brush border, localization of actin and microfilament-associated proteins, immunofluorescence, 839
Mitosis, diatom *Fragilaria*, spindle microtubule distribution, light and EM, 737
–, distribution of major polypeptides of nuclear pore complex-lamina fraction, immunofluorescence and EM, 546
–, lysed PtK_1 cells, vanadate inhibition of chromosome movement, biochemistry and light microscopy, 573
Mollusc *Dolabella auricularia*, longitudinal body wall muscle, calcium intracellular localization and translocation during contraction, EM and X-ray microanalysis, 467
– *Dolabella auricularia*, longitudinal body wall muscle, contraction and ultrastructure of, physiology and freeze-fracture EM, 454
Motility, cell, actin filament polarity, EM, 846
–, cilia, mussel gill cells, calcium control of, light and EM, 110
–, membrane components, Chinese hamster ovary cells, binding of wheat germ agglutinin, biochemistry and fluorescence microscopy, 617
–, saltatory movements, cytoplasmic fibers, BHK-21 cells, light and EM and time-lapse cinematography, 708
Mouse, beige, Chediak-Higashi syndrome, microtubules and actin cables in fibroblasts and macrophages, immunofluorescence, 401
–, diaphragm, open junctions in postcapillary venule endothelium, freeze-fracture EM, 27
–, intestine, brush border microvilli and terminal web, localization of actin and microfilament-associated proteins, immunofluorescence, 839
–, pancreas and exorbital lacrimal glands, acinar cells, electrical coupling and uncoupling, electrophysiology, 533
–, peritoneal macrophages, protein intracellular transport, comparative study, autoradiography and biochemistry, 694
–, peritoneal macrophages, role of membrane proteins in cell adhesion, autoradiography and immunofluorescence, 263
–, salivary gland acinar cells, electrical and dye coupling, electrophysiology and EM, 20
–, spleen, follicular dendritic cells, distribution of horseradish peroxidase-antiHRP immune complexes, immunology and cytochemical light and EM, 184
–, spleen lymphocytes, surface macromolecule capping, distribution of cytoplasmic myosin, immunofluorescence, 409
–, spleen lymphocytes, surface macromolecule capping, effects of local anesthetics and calcium ionophore, immunofluorescence, 419
Mouse, thymocytes, uropod distribution of concanavalin A receptors and surface antigens, light and EM, 235
Mung bean *Vigna radiata*, cotyledons, localization of vicilin peptidohydrolase, immunofluorescence, 10
Muscle, fast, rabbit, type-specific antimyosins and transformation of individual fibers, immunology and fluorescence microscopy, 252
–, longitudinal body wall, mollusc, calcium intracellular localization and translocation during contraction, EM and X-ray microanalysis, 467
–, longitudinal body wall, mollusc, contraction and ultrastructure of, physiology and freeze-fracture EM, 454
–, skeletal, rabbit, sarcoplasmic reticulum membrane asymmetry, tannic acid fixation, EM, 601
Mussel *Elliptio complanatus*, gill cells, calcium control of ciliary arrest, light and EM, 110
Myosin, anti-, type-specific, transformation of individual fibers, rabbit fast muscle, immunology and fluorescence microscopy, 252
–, cytoplasmic, distribution of, surface macromolecule capping, mouse lymphocytes, immunofluorescence, 409
– localization, brush border of chicken intestinal epithelial cells, biochemistry and immunofluorescence, 444
–, mouse intestinal brush border terminal web, immunofluorescence, 839

N

NADPH-cytochrome c reductase, endoplasmic reticulum marker, presence on rat liver Golgi fraction, biochemistry and EM, 581
– P-450 reductase, rat liver Golgi membranes, biochemistry and immunoadsorption and EM, 590
Nerve cord, ventral, crayfish, rectifying electrotonic synapse, freeze-fracture and scanning EM, 764
– roots, intradural spinal, rabbit, intermediate filaments, biochemistry and immunofluorescence, 637
Neurite bundle formation, chick embryo spinal ganglia cultures, role of surface molecule CAM, cinematography and phase contrast microscopy and scanning EM, 382
Neurons, sympathetic, rat, amine uptake system, acetylcholine as transmitter, autoradiography and biochemistry and electrophysiology, 121
–, sympathetic, rat, composition of growing axons, autoradiography and biochemistry and light and EM, 138
Nicotiana excelsior, leaves, quantitation of chloroplast and nuclear DNA, biochemistry and fluorescence microscopy, 631
– *tabacum*, chloroplast DNA visualization, use of probe 4,6-diamidino-2-phenylindole, fluorescence microscopy, 623
Nuclear and chloroplast DNA, quantitation of, tobacco leaf, biochemistry and fluorescence microscopy, 631
– pore complex-lamina fraction interphase and mitotic distribution of major polypeptides, immunofluorescence and EM, 546
Nucleosome fractionation by salt elution, micrococcal nuclease-digested rat liver nuclei, biochemistry and phase microscopy, 97

Nucleus, rat liver, micrococcal nuclease-digested, nucleosome fractionation by salt elution, biochemistry and phase microscopy, 97
–, *Tetrahymena*, membrane lipid fluidity, modulation by matrix proteins, role of Ca/Mg, electron spin resonance and freeze-etch EM, 479

O

Optic tectum, chick embryo brain, distribution of endogenous lectin, immunofluorescence, 491
Organelles, subcellular, rat liver, cytochrome b_5 binding to membranes of, biochemistry and immunochemistry and EM, 291
Ovalbumin, nascent, chicken, functional equivalent of signal sequence, biochemistry, 567

P

Pancreas, guinea pig, acinar cells, calcium-dependent disassembly and reassembly of occluding junctions, effect of drugs, freeze-fracture EM, 156
–, guinea pig, protein intracellular transport, comparative study, autoradiography and biochemistry, 694
–, mouse, acinar cells, electrical coupling and uncoupling, electrophysiology, 533
Phagolysosomes, *Acanthamoeba*, in vitro vacuole fusion, light and EM, 217
Pinocytosis, mediation by platelet-derived growth factor, cultured arterial smooth muscle and endothelial cells, autoradiography and biochemistry and cytology, 663
Plants, tobacco, leaves, quantitation of chloroplast and nuclear DNA, biochemistry and fluorescence microscopy, 631
–, tobacco, spinach, and sugar beet, chloroplast DNA visualization, use of probe 4,6-diamidino-2-phenylindole, fluorescence microscopy, 623
Plasmalemma, ringlike, *Saccharomyces*, freeze-fracture EM, 276
Platelet growth factor, mediation of pinocytosis, cultured arterial smooth muscle and endothelial cells, autoradiography and biochemistry and cytology, 663
Polarity, actin filaments, visualization of, EM, 846
Polypeptides, nuclear pore complex-lamina fraction, interphase and mitotic distribution of, immunofluorescence and EM, 546
–, postsynaptic density, tubulin and actin, rat brain synaptic proteins, autoradiography and biochemistry, 173
–, synthesis, growing axons, rat sympathetic neurons, autoradiography and biochemistry and light and EM, 138
Postsynaptic density polypeptide, tubulin and actin, rat brain synaptic proteins, autoradiography and biochemistry, 173
Procambarus clarkii, ventral nerve cord, rectifying electrotonic synapse, freeze-fracture and scanning EM, 764
Progesterone, maximal secretion, effect on Golgi complex, GERL, and lysosomes, guinea pig corpus luteum, cytochemical EM, 45
Protein intracellular transport, comparative study, autoradiography and biochemistry, 694
Protein synthesis, rat testes spermatid, effects of temperature and glucose, biochemistry and EM, 1
Proteins, cholinergic receptor, localization of, *Electrophorus electricus* electroplaque, autoradiography and biochemistry and electrophysiology, 200
–, matrix, modulation of nuclear membrane lipid fluidity, role of Ca/Mg, electron spin resonance and freeze-etch EM, 479
–, membrane, role in cell adhesion, mouse peritoneal macrophages, autoradiography and immunofluorescence, 263
–, microfilament-associated, localization in microvilli and terminal web, mouse intestinal brush border, immunofluorescence, 839
–, ninety, including actin, synthesis of throughout cell cycle, HeLa cells, autoradiography and biochemistry, 833
–, synaptic, rat brain, tubulin, actin, and postsynaptic density polypeptide, autoradiography and biochemistry, 173
Protozoan *Acanthamoeba*, phagolysosomes, in vitro vacuole fusion, light and EM, 217
– *Crithidia acanthocephali*, kinetoplast DNA, cleavage by restriction endonuclease *Eco*RI and *Hind*III, biochemistry and EM, 329
– *Tetrahymena pyriformis*, nuclear membrane lipid fluidity, modulation by matrix proteins, role of Ca/Mg, electron spin resonance and freeze-etch EM, 479
– *Tetrahymena pyriformis*, quantitative basal body variations in 17 species, light microscopy, 727
Pseudemys scripta elegans, retina, membrane recycling in cone cell endings, EM, 802

R

Rabbit, fast muscle, type-specific antimyosins and transformation of individual fibers, immunology and fluorescence microscopy, 252
–, intradural spinal nerve roots, intermediate filaments, biochemistry and immunofluorescence, 637
–, skeletal muscle, sarcoplasmic reticulum membrane asymmetry, tannic acid fixation, EM, 601
–, small intestine, microvillous membrane, localization of sucrase-isomaltase complex, cytochemical EM, 516
Radioactive label, [^{14}C]galactose, NADPH-cytochrome P-450 reductase, rat liver Golgi membranes, biochemistry and immunoadsorption and EM, 590
– label, [^{14}C]lysine, [^{14}C]tyrosine, and [^{3}H]phenylalanine, spermatid protein synthesis, rat testes, effects of temperature and glucose, biochemistry and EM, 1
– label, [^{14}C]sucrose and [^{3}H]thymidine, mediation of pinocytosis by platelet-derived growth factor, cultured arterial smooth muscle and endothelial cells, autoradiography and biochemistry and cytology, 663
– label, [^{3}H]acetic anhydride, cytochrome b_5 binding to membranes of rat liver subcellular organelles, biochemistry and immunochemistry and EM, 291
– label, [^{3}H]AMP-PNP and [^{3}H]ATP, effects of adenylyl imidodiphosphate on reactivated and rigor wave sea urchin sperm, biochemistry, 827
– label, [^{3}H]fucose, [^{3}H]-glucosamine, [^{3}H]leucine, and [^{35}S]methionine, composition of growing axons, rat sympathetic neurons, autoradiography and biochemistry and light and EM, 138

Radioactive label, [^{3}H]galactose, endoplasmic reticulum marker, presence on rat liver Golgi fraction, biochemistry and EM, 581
- label, [^{3}H]glucosamine and [^{3}H]leucine, glycosaminoglycan pools, substrate adhesion site, murine cells, biochemistry, 788
- label, [^{3}H]glycine, [^{3}H]proline, [^{131}I]sodium iodide, and [^{35}S]methionine, fibronectin synthesis in chondrocyte cultures, role of extracellular cartilage matrix, biochemistry and immunofluorescence, 342
- label, [^{3}H]guanethidine and [^{3}H]norepinephrine, amine uptake system, cultured rat sympathetic neurons, acetylcholine as transmitter, autoradiography and biochemistry and electrophysiology, 121
- label, [^{3}H]leucine, [^{3}H]proline, and [^{35}S]methionine, comparative study of protein intracellular transport, autoradiography and biochemistry, 694
- label, [^{3}H]poly(U), [^{32}P]phosphate and [^{35}S]methionine, growth-related fluctuation in messenger RNA utilization, Vero cells, biochemistry and EM, 85
- label, [^{3}H]proline, cultured primary avian tendon cells, malignant transformation, biochemistry and cytology, 672
- label, [^{3}H]thymidine and [^{35}S]methionine, synthesis of 90 proteins including actin throughout cell cycle, HeLa cells, autoradiography and biochemistry, 833
- label, [^{3}H]thymidine, stratification, specialization, and proliferation of primary keratinocyte cultures, autoradiography and scanning and transmission EM, 356
- label, [^{3}H]α-toxin, localization of cholinergic receptor protein, *Electrophorus electricus* electroplaque, autoradiography and biochemistry and electrophysiology, 200
- label, [^{125}I]iodine, binding of wheat germ agglutinin, mobility of membrane components, Chinese hamster ovary cells, biochemistry and fluorescence microscopy, 617
- label, [^{125}I]iodine, rat brain, synaptic proteins, tubulin, actin, and postsynaptic density polypeptide, autoradiography and biochemistry, 173
- label, [^{125}I]lectins, glycoprotein changes during development of chick neural retina, autoradiography and biochemistry, 132
- label, [^{125}I]protein A, localization of cellular antigens in SDS-polyacrylamide gels, autoradiography and biochemistry and immunology, 281
- label, [^{125}I]sodium iodide, role of membrane proteins in cell adhesion, mouse peritoneal macrophages, autoradiography and immunofluorescence, 263
- label, [^{32}P]phosphate, cleavage of kinetoplast DNA by restriction endonucleases *Eco*RI and *Hind*III, *Crithidia acanthocephali*, biochemistry and EM, 329
- label, [^{35}S]methionine, functional equivalent of signal sequence, nascent chicken ovalbumin, biochemistry, 567
Rana catesbeiana, kidney, glomerular permeability, light and EM, 314
Rat, brain, synaptic proteins, tubulin, actin, and postsynaptic density polypeptide, autoradiography and biochemistry, 173
-, intestine, microvilli, microfilament-membrane attachments, thin section and freeze-fracture EM, 774
Rat, liver, Golgi fraction, endoplasmic reticulum marker enzymes on, biochemistry and EM, 581
-, liver, Golgi membrane, NADPH-cytochrome P-450 reductase, biochemistry and immunoadsorption and EM, 590
-, liver, nuclear pore complex-lamina fraction, interphase and mitotic distribution of major polypeptides, immunofluorescence and EM, 546
-, liver nuclei, micrococcal nuclease-digested, nucleosome fractionation by salt elution, biochemistry and phase microscopy, 97
-, liver, subcellular organelles, cytochrome b_5 binding to membranes of, biochemistry and immunochemistry and EM, 291
-, peritoneal mast cells, localized degranulation induced by concanavalin A-Sepharose beads, role of calcium in stimulus-secretion coupling, light and EM, 394
-, sympathetic neurons, composition of growing axons, autoradiography and biochemistry and light and EM, 138
-, testes, spermatid protein synthesis, effects of temperature and glucose, biochemistry and EM, 1
Receptor, acetylcholine, localization of, *Electrophorus electricus* electroplaque, autoradiography and biochemistry and electrophysiology, 200
-, concanavalin A, distribution on mouse thymocyte uropods, light and EM, 235
Retina, chick, glycoprotein changes during development of, autoradiography and biochemistry, 132
-, turtle, membrane recycling in cone cell endings, EM, 802
RNA, messenger, utilization of, effect of growth, Vero cells, biochemistry and EM, 85

S

Saccharomyces cerevisiae, ringlike plasmalemma structures, freeze-fracture EM, 276
Salivary gland, mouse, coupling in acinar cells, electrophysiology and EM, 20
Salt elution, nucleosome fractionation, micrococcal nuclease-digested rat liver nuclei, biochemistry and phase microscopy, 97
Saltatory movements, cytoplasmic fibers, BHK-21 cells, light and EM and time-lapse cinematography, 708
Sarcoplasmic reticulum membrane asymmetry, tannic acid fixation, rabbit skeletal muscle, EM, 601
- reticulum, mollusc longitudinal body wall muscle, physiology and freeze-fracture EM, 454
SDS-polyacrylamide gel, localization of cellular antigens, autoradiography and biochemistry and immunology, 281
Sea urchin *Lytechinus pictus*, sperm, reactivated and rigor wave, effects of adenylyl imidodiphosphate, biochemistry, 827
- urchin *Strongylocentrotus drobachiensis* and *S. purpuratus*, sperm, in vitro assembly of flagellar outer doublet tubulin, biochemistry and EM, 500
Sepharose-concanavalin A beads, induction of mast cell degranulation, role of calcium in stimulus-secretion coupling, light and EM, 394

Sexual signaling and flagellar membrane agglutination, *Chlamydomonas gam*-1 mutant, freeze-fracture and scanning EM, 74
Signal sequence, functional equivalent of, nascent chicken ovalbumin, biochemistry, 567
Slit diaphragm, frog glomerulus, light and EM, 314
Sperm, sea urchin, in vitro assembly of flagellar outer doublet tubulin, biochemistry and EM, 500
–, sea urchin, reactivated and rigor wave, effects of adenylyl imidodiphosphate, biochemistry, 827
Spermatid protein synthesis, rat testes, effects of temperature and glucose, biochemistry and EM, 1
Spinacea oleracea, chloroplast DNA visualization, use of probe 4,6-diamidino-2-phenylindole, fluorescence microscopy, 623
Spindle microtubules, distribution of, diatom *Fragilaria*, light and EM, 737
Spleen, mouse, follicular dendritic cells, distribution of horseradish peroxidase-anti-HRP immune complexes, immunology and cytochemical light and EM, 184
–, mouse, lymphocytes, surface macromolecule capping, distribution of cytoplasmic myosin, immunofluorescence, 409
–, mouse lymphocytes, surface macromolecule capping, effects of local anesthetics and calcium ionophore, immunofluorescence, 419
Staphylococcus aureus, cellular antigens, localization in SDS-polyacrylamide gels, autoradiography and biochemistry and immunology, 281
Strongylocentrotus drobachiensis and *S. purpuratus*, sperm, in vitro assembly of flagellar outer doublet tubulin, biochemistry and EM, 500
Substrate adhesion site, glycosaminoglycan pools, murine cells, biochemistry, 788
Sucrase-isomaltase complex, localization of, rabbit microvillous membrane, cytochemical EM, 516
Surface antigens, distribution on mouse thymocyte uropods, light and EM, 235
– macromolecule capping, mouse lymphocytes, distribution of cytoplasmic myosin, immunofluorescence, 409
– macromolecule capping, mouse lymphocytes, effects of local anesthetics and calcium ionophore, immunofluorescence, 419
– molecule CAM, relationship to cell adhesion and histotypic patterns, chick embryo neural cells, biochemistry and cytology and EM, 371
– molecule CAM, role in neurite bundle formation, chick embryo spinal ganglia cultures, cinematography and phase contrast microscopy and scanning EM, 382
Synapse, rectifying electrotonic, crayfish ventral nerve cord, freeze-fracture and scanning EM, 764

T

Tannic acid fixation, rabbit skeletal muscle, sarcoplasmic reticulum membrane asymmetry, EM, 601
Temperature, effect on protein biosynthesis, rat testes spermatid, biochemistry and EM, 1
–, effect on yeast plasmalemma, freeze-fracture EM, 276
Temperature, low, effect on cone cell endings, turtle retina, EM, 802
– sensitivity, *Chlamydomonas gam*-1 mutant, flagellar membrane agglutination and sexual signaling, freeze-fracture and scanning EM, 74
Testes, rat, spermatid protein synthesis, effects of temperature and glucose, biochemistry and EM, 1
Tetrahymena pyriformis, nuclear membrane lipid fluidity, modulation by matrix proteins, role of Ca/Mg, electron spin resonance and freeze-etch EM, 479
– *pyriformis*, quantitative basal body variations in 17 species, light microscopy, 727
Thymocytes, mouse, uropod distribution of concanavalin A receptors and surface antigens, light and EM, 235
"Tipping" and mating-structure activation induced by flagellar membrane antisera, *Chlamydomonas* gametes, immunofluorescence and EM, 680
Tissue culture, arterial smooth muscle and endothelial cells, mediation of pinocytosis by platelet-derived growth factor, autoradiography and biochemistry and cytology, 663
– culture, chick embryo spinal ganglia, role of surface molecule CAM in neurite bundle formation, cinematography and phase contrast microscopy and scanning EM, 382
– culture, chick fibroblast chondrocytes, fibronectin synthesis, role of extracellular cartilage matrix, biochemistry and immunofluorescence, 342
– culture, mouse primary keratinocytes, stratification, specialization, and proliferation of, autoradiography and scanning and transmission EM, 356
– culture, primary avian tendon cells, malignant transformation, biochemistry and cytology, 672
– culture, rat sympathetic neurons, amine uptake system, acetylcholine as transmitter, autoradiography and biochemistry and electrophysiology, 121
– culture, rat sympathetic neurons, composition of growing axons, autoradiography and biochemistry and light and EM, 138
Tonofilaments and desmosomes, calf muzzle epidermis, biochemistry and EM, 427
Transformation, malignant, cultured primary avian tendon cells, biochemistry and cytology, 672
Tubulin, actin, and postsynaptic density polypeptide, rat brain synaptic proteins, autoradiography and biochemistry, 173
–, antigenic cross-reactivities, localization in SDS-polyacrylamide gels, autoradiography and biochemistry and immunology, 281
–, outer doublet, in vitro assembly of, sea urchin sperm flagella, biochemistry and EM, 500
Turtle *Pseudemys scripta elegans*, retina, membrane recycling in cone cell endings, EM, 802

U

Uropod, mouse thymocytes, distribution of concanavalin A receptors and surface antigens, light and EM, 235

V

Vacuole fusion in vitro, *Acanthamoeba* phagolysosomes, light and EM, 217

Vacuoles, autophagic, origin of, Golgi complex and GERL, postpartum luteal cell regression, guinea pig, cytochemical EM, 59
Vanadate inhibition of chromosome movement, lysed mitotic PtK_1 cells, biochemistry and light microscopy, 573
Venules, postcapillary, mouse diaphragm, open junctions in endothelium of, freeze-fracture EM, 27
Vesicles, microvillous, rabbit small intestine, localization of sucrase-isomaltase complex, cytochemical EM, 516
Vicilin peptidohydrolase, localization of in mung bean cotyledons, immunofluorescence, 10
Vigna radiata, cotyledons, localization of vicilin peptidohydrolase, immunofluorescence, 10

Y

Yeast membranes, decoration of specific sites, ultra-high vacuum freeze-fracture EM, 646
– *Saccharomyces cerevisiae*, ringlike plasmalemma structures, freeze-fracture EM, 276

Statement of Ownership, Management and Circulation required by Act of 12 August 1970; Section 3685, Title 39, United States Code: *The Journal of Cell Biology*. Published monthly at 1230 York Avenue, New York 10021 by The Rockefeller University Press, New York 10021. Editor: Raymond Griffiths, The Rockefeller University, New York 10021. Owned by The Rockefeller University, New York 10021, nonprofit corporation, authorized to mail at special rates. Purpose, function, and nonprofit status of the organization and the exempt status for Federal income tax purposes have not changed during the preceding 12 months. Following statistics represent 12 month average and number nearest to date of filing: copies printed for each issue, 5067; sales through dealers, street vendors, counter sales, 0; mail subscriptions, 4282. Total paid circulation, 4282; free distribution, 53; office use, left over, unaccounted for, spoiled, 732; net press run, 5067. Single issue nearest filing date October 1978.
